

Raised floor boxes

- 2, 3 & 4 compartment options
- Standard 4-way 6C data plate
- Accessory plate options
- Cable management at exit
- Standard 2-switch UK power
- Low profile 80mm
- 20mm & 25mm knock-outs
- Tough galvanised lid insert

Raised floor boxes are used to connect the sub-floor to the desk via the raised floor itself, power and data are separated into compartments and fed out under a purpose built lid. Each unit comes with 2-switched UK power sockets and a 4-way data plate with 6C cut-outs as standard. Custom accessory plates can be made to order, such as red power plates used to distinguish separate power supplies.

Fixing brackets and floor template are supplied with each unit.
