

Power Pack 3PG power feed units

Image shows P-PACK 4PF/3PG

Modern building electrical practices often use bus-bar or under floor electrical track systems in which the power is 'tapped' via a tap off lead to a power feed unit. The tap off lead is wired to the P-Pack Power Feed unit through a 20mm gland hole to a connecting block. 3 pole connector '3PG' sockets are 16A rated and offer a higher density and flexibly using INTER leads on to the desk power unit.

There are 2 products a 4-way and an 8-way both with 16A RCBO type C 30mA protection with a window cover to avoid accidentally switching off.

Product code

P-Pack 4PF/3PG

Description

4-way 3PG type socket power feed unit, 20mm gland hole entry for tap-off lead, RCBO protected.

P-Pack 8PF/3PG

8-way 3PG type socket power feed unit, 20mm gland hole entry for tap-off lead, RCBO protected.
