

## Individually fused PDUs

Picture shows 10 individually fused sockets

- IEC C13 and IEC C19
- Individually fused sockets
- Individual 'fuse working' neon
- C14, C20, 16A or 32A commando options
- Horizontal 1.5U or Vertical options

PDU's with individual fusing protect each input, each socket is a separate circuit with red neon indicating the fuse is working and not blown.

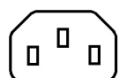

As the power feed may be 16A or 32A the fusing will never allow a current load over the prescribed level of the active equipment, thus individually protecting each input.

---

### Standard products

Order Code	Product Description
HIEC/10 IF	Horizontal 10-way individually fused IEC C13 PDU with 3-metre lead
HIEC/12 IF	Horizontal 12-way individually fused IEC C13 PDU with 3-metre lead
VIEC/16 IF	Vertical 16-way individually fused IEC C13 PDU with 3-metre lead
VIEC/20 IF	Vertical 20-way individually fused IEC C13 PDU with 3-metre lead
VIEC20/C194IF	Vertical 24-way PDU, 20 x C13 & 4 x C19 individually fused with 3-metre lead
