

## Product Datasheet

### 3PG START AND INTER LEADS

#### Product Description

All PowerData Technologies desk power products utilise a 3-pole 3PG mains connector. This method lets the installer use cables of different lengths, allowing for a better managed workspace.

Start leads have a moulded 13A UK plug and a 3PG female connector. These cables are used to power units from the mains.

Inter leads go from a male to a female 3PG connector and are used to join more than one unit, either directly or through the use of 3PG adapters.

All cables are black HO5VV-F 1.5mm<sup>2</sup> 3-core stranded cable, ASTA approved with BS5733 certified 3 pole connectors and cable

#### Standard Products

##### Start Leads

Start 1G	1-metre Start lead, UK plug to 3PG female connector
Start 2G	2-metre Start lead, UK plug to 3PG female connector
Start 3G	3-metre Start lead, UK plug to 3PG female connector
Start 4G	4-metre Start lead, UK plug to 3PG female connector
Start 5G	5-metre Start lead, UK plug to 3PG female connector
Start 6G	6-metre Start lead, UK plug to 3PG female connector
Start 7G	7-metre Start lead, UK plug to 3PG female connector
Start 8G	8-metre Start lead, UK plug to 3PG female connector
Start 10G	10-metre Start lead, UK plug to 3PG female connector

##### Inter Leads

Inter Con	0.25-metre Inter lead, male to female 3PG connector
Inter 0.5G	0.5-metre Inter lead, male to female 3PG connector
Inter 1G	1-metre Inter lead, male to female 3PG connector
Inter 1.5G	1.5-metre Inter lead, male to female 3PG connector
Inter 2G	2-metre Inter lead, male to female 3PG connector
Inter 3G	3-metre Inter lead, male to female 3PG connector
