

3PG connectors and Adaptors

Product mix shown

The male and female 3 pole '3PG' connectors are compatible with all PowerData Technologies desktop and under desk power units, these are screw terminal termination with a in-built cable strain relief.

The 3PG adaptors are to be used with moulded START and INTER cables only, the adaptors (also called splitters) work by using a START lead input to 2, 3 or 5 INTER leads output, so more than one unit can be powered from a single mains socket.

3PG connectors

3PG/M

Male 3PG rewirable connector

3PG/F

Female 3PG rewirable connector

3PG adaptors

3PG/1/2

3PG coupler block, 1 male input, 2 female outputs

3PG/1/3

3PG coupler block, 1 male input, 3 female outputs

3PG/1/5

3PG coupler block, 1 male input, 5 female outputs
